#### RISK PROFILE - LOW

#### Returns

Calculation Benchmark: (ASISA) South African MA Income

#### LOW RISK PROFILE

An Income investor values protecting principal over seeking capital appreciation. This investor is comfortable accepting lower returns for a higher degree of liquidity and/or stability. Typically, an Income investor primarily seeks to minimize risk and loss of principal. Generally low risk portfolios have minimal equity exposure or no equity exposure, resulting in far less volatility and in turn the probability of capital loss is less likely.

#### INCOME ASSET ALLOCATION

The underlying portfolios invest in a spectrum of investments in bonds, fixed deposits, other interest-bearing securities, and at times a low exposure to equities and real estate markets. The Wrap Solution offers the potential for capital growth, together with a regular and high level of income.
